DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 22 June 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 6,389,569 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 142, 149-151 and 153 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 48-49 of U.S. Patent No. 6,775,803.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claim 142 of the present application

and claims 48-49 of U.S. Patent No. 6,775,803 is that claim 142 of the present application recites a **method** of recording a real time file and recording/ reproducing information for ensuring the real time reproduction of the real time file on a medium and claims 48-49 of U.S. Patent No. 6,775,803 recite a apparatus for recording/ reproducing a real time file and recording/reproducing information on and from a medium. However, it is obvious to one of ordinary skill in the art to uses the apparatus claims 48-49 of U.S. Patent No. 6,775,803 to perform a method for recording/ reproducing real time file and real time information as being recited in claim 142 of the present application.

Regarding claims 149-151 and 153, it is obvious to one of ordinary skill in the art to use the apparatus claims 48-48 for perform the method claims 149-151 and 153 of the present application.

4. Claim 155 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,938,199.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claim 155 of the present application and claim 1 of U.S. Patent No. 6,938,199 is that claim 1 of U.S. Patent No. 6,938,199 additionally recite information indicating a real time file. However it is not that eliminating a part is obvious in view of a practitioner in the art. See Elimination of an element and its function---*In re Karlson*, 153 USPQ 184 (CCPA 1963). Therefore, it would have been obvious to one of ordinary skill in the art to modify claim 1 of U.S.

Art Unit: 2616

Patent No. 6,938,199 by eliminating indicating information from claim 1 U.S. Patent No. 6,938,199 to produce claim 155 of the present application.

Allowable Subject Matter

- 5. Claims 152,154, 156-174 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
